

WSR-1
Wi-Fi Music Streaming Receiver

Build a Wi-Fi Streaming Music System

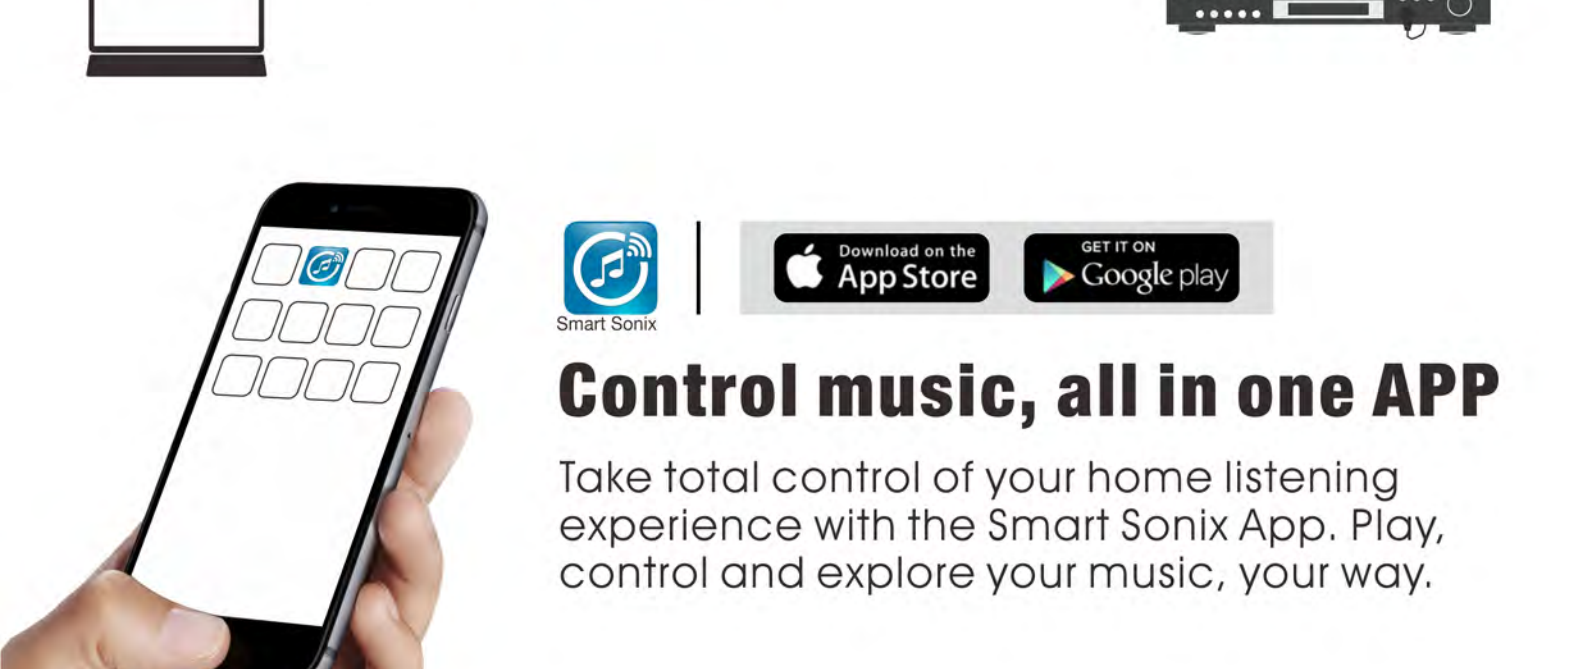

Turn your existing speakers or home theatre into a wireless music streaming system

<p>Wi-Fi Connectivity Each speaker launches wi-fi signal and you can easily configure your music system.</p>	<p>Wi-Fi Repeater Extend Wi-Fi signal coverage</p>	<p>Hi-Fi Sounding Link to amplifier to enjoy your Hi-Fi music</p>	<p>Multi-room System Configure your own music system, stream same music to different zones or even stream different music to separate zones.</p>
<p>Online Music Search and listen to free online music through the app.</p>			<p>Mobile Music Wirelessly play the music stored on your mobile phones.</p>
<p>Internet Radio Smart sonix pre-loaded with TuneIn, more than thousands of free radio stations.</p>	<p>SmartSonix Favorite Save the song you like and create your personal list. Quick start your favorite from the main menu.</p>	<p>Airplay Function With iOS system smart device (iPhone, iPad, iMac), choose Airplay function and play any music you want without app.</p>	<p>DLNA Function With Android system smart device, wirelessly stream the sound by DLNA function.</p>

Easy to set up

Simply few steps, your speaker/home theatre is ready to go.

Control music, all in one APP

Take total control of your home listening experience with the Smart Sonix App. Play, control and explore your music, your way.

Download on the [App Store](#) | GET IT ON [Google play](#)
