

# Palona QUUBI

2.1 Sound system with internet radio/DAB+/UKW/Bluetooth/WLAN/Spotify/Multiroom

When the designers Prof. Bernhard Geisen, Jakab Barna and Martin Sach jointly discuss with swiss engineers, a master piece is caused by a sketch and technical know-how.

## Classic

The Quubi makes not only an impression by its classic design and extraordinary appearance, but also by the brilliant sound. The hand cut design box shines in black-silver and ivory-silver. The aluminium front panel, the metal base and the loud speaker cover appear to be massive. More than 8 kg is the weight of the High End-Design-Object with its 60 watts music power.

## Equipment

Equipped with DAB+, UKW, internet radio, Bluetooth, Spotify and an analog output and input the unit leaves nothing to be desired. Whether you play music with the Quubi from you mobile phone or from the music server, which you installed at home, an USB stick or you use the Quubi as sound bar for TV - the Quubi offers more than anyone could ask for. All information about the stations, song titles or latest news could be deducted from the big color screen.

## Concentrated power

This means concentrated power in a cube with 25 cm edge length. The handling is simple and intuitive. An easy-view remote control and a gratis App for iOS and Android belong to the equipment of the Quubi. Whether you place the Quubi beside your bed for waking up in the morning or place it in the dining or living room or even in the office – the design fits to any interior. By the multiroom function you can dub several Quubis and create a rhythmic sound in your complete living area. The Quubi has already been distinguished with the “Plus X” Award in the category: high-quality, design and easy operation and has been tested “excellent” in AUDIO TEST, DIGITAL fernsehen and DIGITAL TESTED.

# Palona QUUBI

## Palona QUUBI, 2.1 Soundsystem with internet radio/DAB+/UKW/Bluetooth/WLAN/Spotify/Multiroom

- WLAN dual band ( 2,4 / 5 GHz ) internet radio with over 40.000 radio stations and podcasts
