

## Models

The built-in hi-fi equipment bases are available in the two different sizes M and L. Along with the option of choosing 1 to 4 levels, it is always possible to find the perfect configuration for any system.

### Mounting surface per level

size:	M	L
width:	500mm	550mm
depth:	450mm	500mm
height:	110mm	200mm
max. load:	30kg	30kg

### Overall dimensions\*

size:	M	L
width:	560mm	610mm
depth:	450mm	500mm
height:		
1 level	115mm	115mm
2 levels	320mm	420mm
3 levels	525mm	725mm
4 levels	730mm	1030mm

\*without spikes

### Finish

-  black matt
-  black high gloss
-  white matt
-  white high gloss
-  silver metallic
-  blue metallic
-  red metallic
-  green metallic
-  ash tree
-  walnut

## Review

"During my trials with diverse components ... there wasn't a single device that would not respond in a positive way. ... To me the SMD Ambitious has definitely component status."

*Olaf Sturm,  
HiFi & Records,  
01/2016*

The Fundamentals of Sound.

# SMD Ambitious

# THIXAR

The fact that high-end hi-fi equipment tends to show a highly sensitive response to whatever it is standing on is an open secret. Both solid-state and tube amps as well as analogue turntables can only reveal their full potential if they can do their work undisturbed by any vibration. Only then can you experience the sense of space, the dynamics and richness of detail in full audiophile splendour.

That's why we have developed the new "SMD Ambitious" rack system range, based on the highly successful "Silence" equipment base. In doing this, we focussed on isolating the surface on which the equipment stands from vibrations of the shelf beneath, in order to minimise the amount of external vibration affecting the equipment.

In this new design, an advanced version of our unique gel base is used. The full area of the mounting surface is borne by a gel layer, which achieves two important objectives:

1. There is no fixed contact between the rack system and the mounting base, meaning that external sources no longer trigger the equipment to vibrate.
2. The gel dampens the mounting base in a way that is targeted towards eliminating vibration of the equipment itself.

ALL WE ARE  
SAYING, IS  
GIVE PEACE  
A CHANCE

Together with the hand-polished, chromed spikes, which make sure that the equipment is standing properly aligned on a secure base, this guarantees a unique sound experience.

Attention has been given not only to the acoustic aspect but also to the visuals. Keeping in line with "form follows function", the system is integrated into a modern, highly flexible design. With smart painted and wooden surfaces, the rack can be customized to fit in with your existing furniture. Alternatively, you may deliberately choose to go for an eye-catching contrast by using the finishes in the Sparkling range.
